K A PRANAV

Full Stack Developer

Thiruvananthapuram, Kerala, India | pranavsachu658@gmail.com | +91 7907482381

PROFESSIONAL SUMMARY

Computer Engineering graduate with hands-on experience in full-stack development using React.js, Node.js, Express.js, and MongoDB. Passionate about exploring emerging technologies, leveraging AI tools to learn and build practical projects, and turning ideas into useful products. Eager to contribute to real-world development and continuously expand technical skills.

TECHNICAL SKILLS

Programming Languages: JavaScript, Python

Frontend Development: React.js, Tailwind CSS

Backend Development: Node.js, Express.js, REST APIs

Database: MongoDB, SQL Server

Tools & Platforms: Git, GitHub, VS Code, Figma, Claude AI, Google Antigravity

EXPERIENCE

MERN Stack Web Development Intern July 2025 - February 2026

Luminar Technolab, Trivandrum, India

- Completed hands-on training in MERN stack web development, covering MongoDB, Express.js, React.js, and Node.js.
- Learned to build frontend interfaces using React.js, JavaScript, HTML, CSS, and Bootstrap.
- Practiced developing backend applications and REST APIs using Node.js and Express.js.
- Worked with MongoDB for storing and managing application data.

Frontend Development Intern November 2024

White Track Technologies

- Received practical training in frontend web development using HTML5, CSS3, and Bootstrap.
- Learned the basics of creating user-friendly and visually structured web interfaces.

PROJECTS

StudyAI - AI-Powered Study Platform | React.js, Node.js, Express.js, MongoDB, Groq LLM API

- Built a full-stack AI-powered study platform that converts uploaded PDFs into smart notes, quizzes, flashcards, and summaries.
- Integrated Groq Llama 3.1 8B with custom prompt engineering and JSON parsing to generate structured educational content from raw document text.
- Developed secure REST APIs with JWT authentication, MongoDB persistence, PDF text extraction and cleaning, and progress tracking.
- Designed an interactive React.js dashboard for real-time content generation and study progress visualization.

RAG-Application | Python, Streamlit, ChromaDB, Sentence Transformers, Groq LLM API

- Developed a Retrieval-Augmented Generation (RAG) application that answers questions from uploaded PDF documents using semantic search and LLM-generated responses.
- Implemented PDF ingestion, text chunking, local embedding generation, and persistent vector storage with ChromaDB for relevant document retrieval.
- Integrated the Groq LLM API with context-grounded prompts and safeguards to reduce unsupported answers and mitigate prompt-injection risks.
- Implemented content-hash-based embedding deduplication and query-response caching to avoid redundant processing and repeated LLM API calls.

EDUCATION

Diploma in Computer Engineering 2023 - 2025

MGM Polytechnic College, Kilimanoor, Trivandrum, Kerala, India

CGPA: 7.62 / 10

CERTIFICATIONS

- Web Development using Python Django - IPCS Global
- Front-End Development Internship Certification - White Track Technologies
